

TBSHS Medical Society

2013 -2014

What inspires you?

- Joining a Medical Society, shows to admission tutors, and those interviewing you that you love the field of healthcare
- By joining ‘MedSoc’, you will be kept up-to-date with the latest in Medicine and related fields
- You will get opportunities to help host talks from Medical Students, Professors and also be able to go on trips to various places of Medical significance
- You have show initiative and desire to be part of healthcare by becoming a member

Why ‘MedSoc’ is helpful?

- At these meetings we do various things from term-to-term (Last year was a trial run). At Every meeting we will be:
 - Discussing any interesting advances in the Medical Field week-by-week
 - Based on a theme set every 4-5 weeks, a member will present a short Powerpoint on a specific topic
 - Completing the Term's 'Medsoc Report'
- Occasionally, a relevant documentary may be shown
- Every term, we will try and organise at least one MedSoc Field Trip or host a Talk from a relevant person

What we do at MedSoc

- This term we will be focusing on reviewing the NHS , its functions and its problems.
- A pilot couldn't fly a plane without understanding his cockpit; and so too, a healthcare professional cannot practice his field without understanding his/her workplace: the NHS
- The NHS is a hot topic among interviewers who would like to see how informed you are
- This review will comprise of different components tackled by different groups, with a goal of amalgamating our knowledge, after peer-review through presenting your findings, and creating an NHS Review for the year 2013-2014
