- 15 – 17 August - Engineering Experience Wales (Residential) – Year 9 and 10 – University of South Wales – [more information](#)
- 16 – 18 August – Girls into Engineering (Residential) – Year 8 and 9 – Loughborough University – [more information](#)

A Career In Space

Learn about the science activities that astronauts perform on the International Space Station.

How many astronauts live there?

How long do they stay?

What kinds of science do they do, and what's so important about doing science in space, anyway?

Can students participate in science on the space station?

Dr. Ruttley will answer these questions and more as she shares her experience of managing the science activities on the space station during her career at NASA. She'll also talk about future career possibilities for today's students.

This 1 hour session for students will help students view space careers from a whole new perspective

Join at 2pm on Wednesday 29th June 2022

Register at: <https://forms.office.com/r/szd77vFHqK>

Careers in Music

If you are a bright-minded enterprising individual dreaming to branch out on your own one day, *Pearson Education* have created this handy guide to help get you started. Filled with the good, the bad and the ugly, Pearson have given upfront and honest advice about the best ways to get your business off the ground. From founders across various industries including fitness, food, education and even YouTube.

Whether starting up your own business, or working within a large corporation, the guide will inspire you and help unlock your potential and kick-start your career. [Click here to register for download](#)

Careers In Science

Futurum Careers, a free online resource and magazine aimed at encouraging 14-19-year-olds worldwide to pursue careers in science, technology, engineering, maths and medicine (STEM), and social sciences, humanities and the arts for people and the economy (SHAPE). Dr James Seddon is a Clinician Scientist, and as a researcher at Imperial College London he is conducting a clinical trial to test the effectiveness of a new drug at preventing children who have been exposed to multidrug-resistant tuberculosis from developing the disease. Dr Seddon has produced free resources for teachers wishing to explore the career of Clinician Scientist and tuberculosis. [Find out more about Dr Seddon and download resources.](#)

Years 7-9 Imperial - STEM in Action: Energy and Sustainability

[Energy and Sustainability](#) is our latest module for young people aged 11 to 14, to learn more about how scientists and engineers at Imperial College London are working toward creating a sustainable and net zero future.

[STEM in Action](#) is an online resource with themed videos and activities that can be done at home. Explore all three modules available to learn more about the different types of research at Imperial.

Year 10 - What Is Chem Eng? Thursday 14 July, 16:30 to 17:30

Imperial College Chemical Engineering Society invites students to attend a one-hour online event sharing information on our course, what it is and how it applies in the real world. Hear from recent chemical engineering graduates from a range of industries about what they do and inspire your students to learn more about one of the most crucial and exciting fields of engineering. Although the talk is aimed at students in Year 10, other students are welcome to

attend. The talks will be followed by a Q&A. Please use the link below to register your interest and sign up for the event. For any further queries please email chemengsoc@ic.ac.uk - [sign up now \(individuals\)](#)

The Air League Trust – Soaring to Success

The Air League is pleased to be able to offer access to the e-learning component of the *Soaring to Success*® programme at no cost. The *Soaring to Success*® programme forms the basis of the Air League's youth outreach and encourages young people to consider a career within aviation and aerospace. There are many career opportunities within these industries in addition to flying roles, and the programme aims to demonstrate the breadth of opportunities available.

The e-learning careers enrichment courses are built with partner companies to take the students through a scripted narrative which provide:

an insight into industry through the lens of a company or industry,
new industry-related learning and transferrable skills, and
career profiles, apprenticeship information and signposting.

The current modules and topic areas are:

An introduction to the platform and the modules,
British Airways – Airline Operations and Customer Service
Civil Aviation Authority – Cyber Security
Eagle Eye Innovations – Drones and Remotely Piloted Systems
BAE Systems – Cockpit Design
Bristol Ground School – Pilot Training

Each module contains interactive elements, a short knowledge check assessment and a brief feedback form.

There is also additional signposting to the Department for Transport funded *Talentview Aviation* platform which contains: industry apprenticeships, placements and work experience opportunities; job listings including entry level positions; and information about Further and Higher Education providers. [Click here](#) to find out more – and the main [website is here](#). Do check out the 'Our Programmes' section.

Explore job roles and take the careers quiz. [Click here](#)

Careers Sessions With Speakers For Schools – Summer Fest

For students aged 14-19, workshops for 11-14 years old Between 4-8th July, *Speakers for Schools* are presenting online Discovery Workshops for young people to hear from new and out of the ordinary creative career opportunities. Each day, young people will hear from employers such as Regatta, Benefit Cosmetics and speakers from different roles such as Set and Costume designers and Stunt coordinators, to find out about the interesting work that they do. On 8th July, as part of the festival, Richard Waterworth, General Manager of TikTok EU, will be giving a broadcast about why creativity matters, and students will have the chance to ask questions. If you are interested in registering for this event, please register [here](#).

Resources

Years 11-13 News From Imperial College Making it Brain: Neuroscience Conference For Students

The *UK Dementia Research Institute (UKDRI)* is delighted to host a second research and careers mini-conference for secondary school students from Year 11 upwards. The online webinars are free for attendees and include talks and live Q&As with student and staff speakers from the UK Dementia Research Institute who are pioneering dementia research - from cells to circuits, systems to patients. Go behind the scenes and see what research actually looks like inside a working laboratory in a series of videos from the UKDRI. For more information visit [UK Dementia Research Institute](#) and register

Years 7-9 Cyber Explorers

The world that we live in is becoming increasingly technology-dependent.

Introducing **Cyber Explorers**, an initiative led by the *Department for Digital, Culture, Media and Sport (DCMS)* designed to engage 11-14 years olds in cyber security learning. Coinciding with demands from the digital technology sector, *Cyber Explorers* presents an opportunity to develop the knowledge and skills required to safely navigate the modern online world and introduce students to careers in digital, cyber and wider technology. [Click here](#)

Free Blockchain Workshop

Blockchain technology is essential to Bitcoin, Ethereum, and other cryptocurrencies, but its applications go far beyond that. Join our one-day, interactive workshop running on [Saturday 25th June, 9:30am – 4:30pm](#). Join us to gain an understanding of the blockchain network, its ever-growing applications, and its potential to disrupt socio-economic systems.

The workshops are certified by the UK's leading IT Training provider, QA Ltd, and provide you with a **Certificate of Achievement** and **Social Badge** upon completion.

What will I learn?

What is Blockchain?

Why Blockchain?

The Blockchain Network

Block Structure

P2P network

Mining process

Difference between Proof of work and Proof of stake

How transactions are stored on a blockchain.

How Blockchain guarantees data integrity (e.g. why it is so hard to 'hack').

Different types of Blockchain

And so much more!

Who should attend?

Anyone who has an interest in gaining skills in Blockchain. This workshop is well suited to those with little to no knowledge of Blockchain. It would also act as a nice refresher for those who want to stay up to date in their skills as well as for those who would like to expand their knowledge about what Blockchain is and how it works.

Insight Summer School

Studying Maths/sciences? Any one 16 and over can sign up to this virtual summer school and study in your own time between 20 June-14 August – 30 hours to be completed at your own pace. With the mix of live sessions, recorded lectures and hands-on practical STEM activities set by leading UK universities and global STEM companies, you will have a unique opportunity to access content in one place, pick-and-choose subjects that interest you.

Life Sciences from University of Warwick

Materials Science from University of Cambridge

Maths from Lancaster University

Food Science from University of Nottingham

Chemistry and Drug Design from Kingston University

Chemical Engineering from UCL

Forensic Science from Abertay University

Engineering from University of Sheffield

Computer Science from University of Liverpool

Apply asap: <https://www.etrust.org.uk/insight-into-university>
