

# MATHEMATICS FOUNDATION TIER KEY STAGE 4 YEARS 9, 10 AND 11

# 2024-2027

## COURSE : EDEXCEL GCSE 1MA1 9 TO 1 (FOR YEARS 9,10,11)

GCSE Mathematics 9to1 is taught to all students over three years. There are two tiers of entry at GCSE, Foundation and Higher, and students are entered for each tier depending on their level of ability and target grades.

In each of years 9,10 and 11, students study a range of techniques from Number, Algebra, Geometry, Measures, Probability and Statistics. These build on each other over the course of the years as our students' progress.

The final assessment of the course involves three examined papers, two with the use of a calculator and one without.

Equipment

It is imperative that students have a calculator with them for their mathematics lessons as they will need to get used to the way their own individual calculator works before they sit the examinations. There are many calculators available and they can work in different ways so it is vital that our students get to know a particular calculator. We recommend Casio FX83GT or Casio FX991ES ( if students would like a calculator for GCSE and A Level ).

Students should also have a geometry set.
